

FRS Credit Bureau Links

Beginning with the system's earliest versions, the **FRS** suite of background screening tools has provided direct links to the "big three" credit bureaus. These links empower the clients of FRS with the ability to seamlessly order any of the Credit Report or Social Trace products that these bureaus provide to employment screening and tenant screening companies. With the complete flexibility provided by these links, **FRS** clients are equipped to tailor their products and services to satisfy the needs of their client base by providing a full range of background searches.

Through joint ventures with the vendor relations departments of these companies, the **FRS** Credit Bureau Links provides an immediate reduction in the labor required for processing the Credit Report and Social Trace searches.
